Subject: RE: NCA4 report

There was a story on NPR (with interview by Kathryn Hayhoe) on this. This is the Climate Science Special Report (which is the first part of the National Climate Assessment). As Kathryn and Andy note, the report was released for public comment in Jan. so no one had to "leak it" and the NAS review of the report is posted here:

https://www.nap.edu/catalog/24712/review-of-the-draft-climate-science-special-report?gclid=Cj0KCQjwwqXMBRCDArisAD-AQ2gwEcNlaAoo8l8wOub2KKO-wwBA13CUx2h8HnIcA4gm2xiEBVUqyOAaAjB8EALw_wcB

It didn't get a lot of press at the time, so the timing here is interesting.

Gayle - this is the Climate Science Special Report that we've discussed lately and is now being reviewed. The story doesn't say much of anything new. It seems to be an effort by one of the external authors to put pressure on the administration to release the report. Which isn't that different from the public comment draft released in January.

It will be interesting to see if this affects the hands-off approach that EPA has taken on this so far.
